THE SAFE-FLEX™ ADVANTAGE 5

Five reasons why Safe-Flex™ Floor System
is the world's greatest matting

Safe-Flex™
Advantage 5 Video

1

ERGONOMICS:

Patented **Compression Flex Technology™** promotes subtle micro-muscle movements, stimulating blood flow, oxygenating the muscles and protecting the body's four key shock absorbers.

2

RISK MITIGATION:

Guaranteed not to curl or tear, Safe-Flex™ removes slip and trip hazards found with conventional matting.

3

DURABILITY:

The Safe-Flex™ Floor System will outlast all other matting, providing a better cost savings. In some cases you'll get 10X the life span with Safe-Flex™.

4

VERSATILITY:

Safe-Flex™ modular tiles allow for total size and colour customisation thanks to our unique connection system.

5

SUSTAINABILITY:

Safe-Flex™ diverts more than 1M kgs of scrap PVC and TPE from local landfills annually and is 100% recyclable at end of life.

STANDARD FEATURES

CABLE WIRE MANAGEMENT

Eliminate trip hazards with our unique leg structure. Safe-Flex™ provides a great solution for those unwanted cables & wires.

SUPERIOR LOCKING MECHANISM

Exclusive 6-tab connector system, that's easy to connect and will not separate, even in harsh workspaces.

SAFE-FLEX™ WON'T BURN

With fire protection class Cfl - s2, we offer several solutions that are ideal for welding areas

Compression Flex Technology™

ENERGY RETURN:

Our spring-like design returns energy back to the body, reducing fatigue, ensuring all-day support.

Cross section of ergonomic domes compressing

MOVEMENT AND BLOOD FLOW:

The compression domes and diamond pattern create subtle micro-muscle movements, this promotes blood flow.

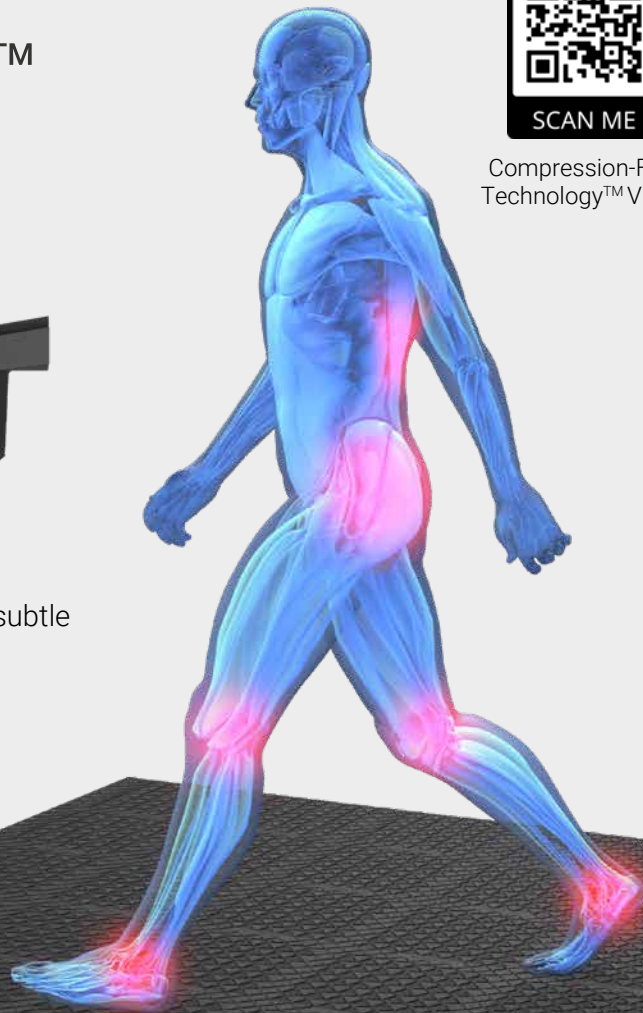

JOINT SUPPORT AND FATIGUE RELIEF:

Increased blood flow energises the muscles supporting the bodies four key shock absorbers.

THE SAFE-FLEX™ ANTI-FATIGUE LINEUP

RESPONSE ANTI-FATIGUE TILE – A1-B

Our bestselling anti-fatigue tile made from 100% recycled PVC, designed with our patented Compression Flex Technology™.

Use: Dry areas with heavy foot traffic.

Applications: Heavy manufacturing, welding, stamping & more.

Sizes: 46cm x 46cm, 15cm x 46cm

Edges/Trim: A3-Y, A4-Y, A5-Y, A6-Y

Available Colours:

REFLEX ANTI-FATIGUE TILE – RF1-B

Our Reflex anti-fatigue tiles are made from recycled TPE. A more flexible tile designed for all day support.

Use: Dry areas with light foot traffic.

Applications: Light manufacturing, warehousing, commercial & more.

Sizes: 46cm x 46cm, 15cm x 46cm

Edges/Trim: A3-Y, A4-Y, A5-Y, A6-Y

Available Colours:

ESD ANTI-FATIGUE TILE – ESDA1-B

Same patented compression system with embedded anti-static polymers to protect equipment and workers from static shock.

Use: Areas prone to static shock.

Applications: Electronics manufacturing, paint booths, oil and gas, & more.

Sizes: 46cm x 46cm, 15cm x 46cm

Edges/Trim: ESDA3-Y, ESDA4-Y, ESDA5-Y, ESDA6-Y

Available Colour:

SMOOTH TOP SOLUTION

SMOOTH TOP TILE – A1-SMB

Our smooth top tile offers a flat surface to accommodate anything with wheels. If paired with our heavy duty inserts, you can drive forklifts weighing up to 4500kg.

Use: Dry areas with wheeled traffic.

Applications: Heavy manufacturing, light manufacturing, desk areas & more.

Size: 46cm x 46cm

Edges/Trim: A3-Y, A4-Y, A5-Y, A6-Y and/or HD Low Profile Edges

Available Colour:

ANTI-FATIGUE DRAINAGE SOLUTIONS

ANTI-FATIGUE DRAINAGE TILE – A2-B

Our same supportive compression system but with holes for airflow and drainage of non-oil based liquids from the surface.

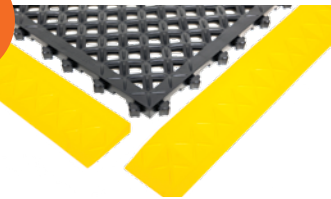

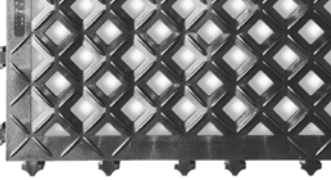

Use: Wet areas with heavy foot traffic.

Applications: Heavy manufacturing, light manufacturing, commercial & more.

Size: 46cm x 46 cm

Edges/Trim: A3-Y, A4-Y, A5-Y, A6-Y

Available Colour: 

ANTIMICROBIAL DRAINAGE TILE – AM2-B

Formulated with an antimicrobial additive to resist the growth of bacteria and fungus.

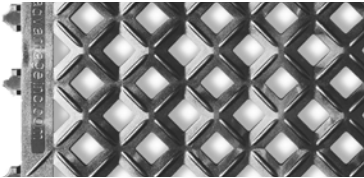

Use: Areas prone to bacteria and fungus growth.

Applications: Food packaging, bottling, pharmaceutical & more.

Size: 46cm x 46 cm

Edges/Trim: AM3-Y, AM4-Y, AM5-Y, AM6-Y

Available Colour: 

GRITTED ANTI-SLIP SOLUTIONS

ANTI-SLIP TILE – AG1-B

Featuring our proprietary aluminum oxide coating, our anti-slip solutions are specifically designed to keep workers feet planted on the floor. Certified R13 Slip Rating.

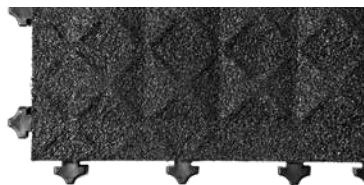

Use: Oily or heavy dust areas.

Applications: Heavy manufacturing, machining, welding & more.

Sizes: 46cm x 46cm, 15cm x 46cm

Edges/Trim: AG3-Y, AG4-Y, AG5-Y, AG6-Y

Available Colour: 

ANTI-SLIP DRAINAGE TILE – AG2-B

The most aggressive anti-slip matting surface on the market with drainage for oils and coolants. Certified R13 Slip Rating.

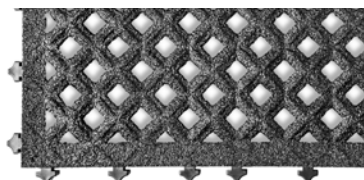

Use: Oily or heavy dust areas.

Applications: Heavy manufacturing, machining, welding & more.

Size: 46cm x 46 cm

Edges/Trim: AG3-Y, AG4-Y, AG5-Y, AG6-Y

Available Colour:

 @ergoadvantage

 @safe-flexfloorsystemuk

The Safe-Flex™ Floor System is a premium, flexible and safe modular industrial flooring solution that solves challenges faced by many organizations. The patented Compression Flex™ construction provides the industry's top anti-fatigue support. The floor system can be custom fit or purchased in ready-made standard sizes. The anti-slip varieties work in wet or even oily environments, and bevelled edges ensure that workplace slips, trips and falls are greatly reduced. The ESD and anti-microbial options provide additional environmental control. All matting options are impervious to most chemicals and are class 1 fire resistant. Tiles are sustainably produced using recycled materials and feature world class connection lugs that will last beyond the competition's. A Safe-Flex™ Floor System works as hard as you do to protect your most important asset—your employees.
