

ESD
ANTI-FATIGUE TILE

ESDA1-B

DIMENSIONS: 45cm x 45cm

WEIGHT: 2.5KGS

COMPOSITION: RECYCLED PVC, ESD ADDITIVE

COLOURS: BLACK (CUSTOM COLOURS AVAILABLE)

APPLICATIONS: ELECTRONICS MANUFACTURING, PAINT BOOTH, OIL AND GAS & MORE

THE SHOCK-RESISTANT TILE

Even a small discharge of static electricity can injure employees and ruin semiconductors. Our tiles are engineered to **discharge static buildup**.

ESD TEST RESULTS

RESISTANCE TO GROUND POINT(ANSI ESD S7.1)	6.13E+08 Ohms
RESISTANCE POINT TO POINT(ANSI ESD S7.1)	1.40E+08 Ohms

ADDITIONAL FEATURES

STAY PROTECTED

ESD polymers are **embedded** in our anti-fatigue tiles during the injection molding process. If the tile wears, you will still be protected.

ERGONOMIC BENEFITS

Our patented **Compression-Flex Technology™** will support employees all-day. The compression domes and diamond pattern will generate micro-muscle movements, promoting blood-flow. The support legs evenly distribute body weight while supporting the body's shock absorbers.

CUSTOMISABILITY

With custom colours available and the ability to connect with any Safe-Flex™ Floor Tile, you are able to designate ESD-specific work areas.
