

OUR ENVIRONMENTAL COMMITMENT

6 **.3 BILLION** TONS OF PLASTIC HAVE ENDED UP IN LANDFILL SINCE THE START OF MASS PRODUCTION. AS ADVOCATES FOR A CLEANER AND SAFER ENVIRONMENT WE SHOULD ALL BE LOOKING AT WAYS TO TAKE OUR SUSTAINABILITY EFFORTS FURTHER

“ We’re on a mission to help companies around the globe lessen their environmental impact. Every year millions of tons of usable material go into landfills. Let’s use what we have to create products that better the health of your employees and make the workplace safer. ”

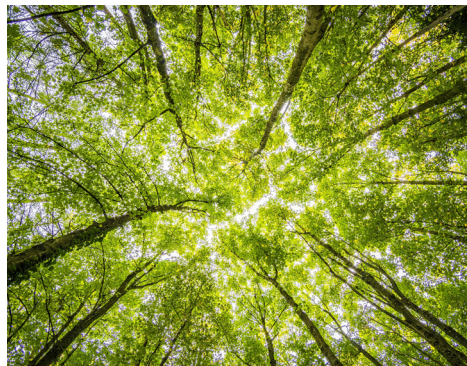

- Jillian Foley, VP, Ergo Advantage Inc

CREATING A CIRCULAR ECONOMY

USING LESS & BETTER

Stand-Safe mats use 100% recycled PVC and TPU, diverting over 2.4M lbs from landfills each year.

USING LONGER

Unlike traditional foam matting, Stand-Safe has an expected life cycle of 2-5 years. Making us the longest lasting anti-fatigue matting on the planet.

USING AGAIN

When our product reaches the end of its life cycle, they are recyclable and re-enter the circular economy, once again.

SUPPORTING YOUR INITIATIVES

ENVIRONMENTAL, SOCIAL AND GOVERNANCE CRITERIA (ESG)

- **What is ESG?** ESG stands for Environmental Social and Governance, and refers to the three key factors when measuring the sustainability and ethical impact of an investment in a business or company. Most socially responsible investors check companies out using ESG criteria to screen investments.

It is a generic term used in capital markets and commonly used by investors to evaluate the behavior of companies, as well as determining their future financial performance. The Environmental Social and Governance factors are a subset of non-financial performance indicators which include ethical, sustainable and corporate government issues such as making sure there are systems in place to ensure accountability and managing the corporation's carbon footprint.

- **How does purchasing Stand-Safe support your ESG initiatives?** When you purchase a Stand-Safe product you are making an informed, environmentally positive and ethical purchase. Our supply chain is completely transparent, with ethical practices in place. Further, you are supporting the North American economy, with all materials and manufacturing taking place in North America.

ASK US ABOUT OUR EXISTING RECYCLING PROGRAMS

- Proud leaders in Environmental Excellence
- We're partnered with Green Metals Canda, global leaders in recycling TPU materials that were destined for the landfill
